ELECTRONIC DATA DISCOVERY

We are dedicated exclusively to delivering comprehensive services and expert guidance that transform the burdensome nature of electronic discovery into a streamlined, legally defensible business process. Trial Copy Legal Document Services can help improve your organization's ability to respond to electronic discovery obligations.

Trial Copy builds an investigative solution to meet your specific needs.

The first step in enterprise data protection and data governance is determining where sensitive data resides and how it is vulnerable to theft, misuse and noncompliant activity. With sensitive data stored in databases, file servers and mainframes across the enterprise, gaining this insight can present significant challenges.

E-Discovery Solutions

We can capture all forms of electronic files and then convert them to industry standard image files.

We offer foreign language document processing to recognize, search and produce data containing over 300 different languages.

- Understand your organization's readiness to respond to e-discovery.
- Develop and implement repeatable business processes for defensible and efficient e-discovery response across your organization's entire legal portfolio.
- Proactively assess all potentially responsive electronically stored information (ESI) when preparing for litigation or investigation.
- Prepare e-discovery conferences, including reviewing actions already taken, gather details about your organization's ESI, document the protocols, and prepare counsel for successful "meet and confer" negotiations.

COMPUTER FORENSICS

Our data recovery services are capable of recovering lost data due to:

Logic Problems - such as destroyed partition tables, boot sectors and bad file allocation tables (FATs)

Mechanical Problems - such as hard drives which won't spin up reliably or in which there has been a hard head crash.

User Error - such as accidental or intentional data deletion, reformatting or repartitioning (FDISK)

Viruses - We identify and eradicate those pesky viruses as well as the damage they've caused, such as data deletion, misplacement or corruption.

Password Defeat - We're able to make files accessible which have been previously locked with passwords.

Heat, Smoke & Moisture - We can even recover data from hard drives and diskettes which have been subjected to fires, heat, smoke, and moisture.

At Trial Copy we know that drives occasionally fail - mechanically, electronically, or due to data corruption. And when they do, we're able to get you back up and running quickly. We also know that users, bent on thwarting a potential computer forensics examination or perhaps simply being malicious, can make a computer's data inaccessible.

Trial Copy is proud of its success rate, fast turnaround, and competitive rates. Whether your problem requires manipulation of system files or clean room services, we're available to help you.

TRIAL GRAPHICS

Trial Copy's graphic department consists of experienced artists schooled in advertising and graphic design who harness the power of technology and produce compelling demonstrative aides. By effectively using imagery, color and design techniques. From simple document blowups to complex chronologies and everything in between, Trial Copy has a cost effective and powerful presentation solution for you!

Visual Images consist of the following:

- Custom Trial Graphics
- Exhibit Boards
- Medical Illustration
- 3-D Animations
- Organizational Charts
- Timelines
- Illustrations
- Video Depositions with scrolling text
- "Day in the Life" videos
- Multimedia Presentations

At Trial Copy we offer unique perspective. Our team provides creative ideas, innovative solutions and experience. Technology is changing as well as the way attorneys present their cases. Trial Copy provides innovative tools that make easier for you to prepare your case and present your information effectively. Every phase of the creative process is customized to meet the needs of your case. No matter what you need or when you need it you can be confident in our ability to assist you.

By using color, shapes, titles, icons and other aesthetic tools, our designers can condense complex ideas into easy-to-understand graphics for either board or electronic presentation

DOCUMENT MANAGEMENT

Electronic document management to help your business save money and become more time efficient when managing, storing, and retrieving important documents. You can convert all your files to digital media and access them quickly right from your computer with our secure, online document management service

Trial Copy Document Management System is the solution to easily secure, share, track and manage the documents and records your organization depends on. Digital imaging and storage give you the power to access the important documents you need at anytime from any where.

Trial Copy' feature service that is designed for law firms.

- Flexible Organization
- Extensive Security
- Powerful Searching
- Document Editing
- Easy to Use and Administer
- Customization and Web Services
- Complete Suite

Trial Copy offers organizations of all sizes a web-centric, SaaS (Software-as-a-Service) document, email and records management service, including extranet services. Documents can be easily and securely shared with clients and others, and documents are protected and backed up in redundant, world-class data centers to ensure built-in business continuity. Documents can also be backed up locally on your network.

One of the advantages of integrated digital document management is the potential reduction in staff by automating a number of processes. In practice the skilled permanent staff can be transferred to other more valuable roles and the savings were made at sub-contract clerical levels.
